

## GLIDING NEW ZEALAND : HANDICAP REGISTER

This handicap register is intended to list all New Zealand registered sailplanes plus some foreign registered sailplanes that regularly compete in New Zealand. The register is maintained by the Sailplane Racing Committee (SRC) and uses the relevant BGA handicap current at the date above unless special circumstances apply or there is no BGA handicap available.

Any pilot wishing to compete in a sailplane that has been aerodynamically modified from standard (other than sealing) shall apply to the SRC at least one month before the contest starts with sufficient information for the SRC to establish an appropriate handicap.

If a particular sailplane may be flown with alternative wing spans, it will appear more than once in the table. For any sailplane not listed by registration, the appropriate handicap for type shall be applied.

For ease of reading, handicap values have been multiplied by 100 (eg 114 means 1.14 for marking).

Any sailplane is eligible for the Open Class. For convenience, eligibility for 18m, 15m, Standard and Club classes is indicated by a ✓, but in any case Contest Rule 1.2.1 is definitive.
